

```
import java.util.Scanner;
public class ExceptionHandlingDemo
{
    static Scanner scan = new Scanner(System.in);
    public static void main(String[] args)
    {
        Person person = new Person();
        System.out.println("Please enter a person's data.");
        person.read();
        System.out.println(person);
    }
}
```
